Knowledgeable Front End Developer adept at creating successful websites that meet customer needs. Specializing in collaborating with customers to gather requirements, produce plans and improve designs for usability and functionality

Projects

Twitter Clone
Developed a social media app clone using React, Twitter-embed library, MUI, FlipMove library.

Google Clone
Integrated Google's API to create a real-world search engine and used MUI to style it.

AnimeWorld
I used JavaScript, HTML, CSS and ReactJS to make a responsive Anime search website. I used Jikan API to pull data and populate the results, I also used React Router and React Hooks.

GMail Clone
I made a clone of Gmail, I used firebase firestore for the database, firebase auth google auth for login. I used Redux for a global store that could be accessed anywhere in the app, I also used React Router and React Hooks.

Experience

2022-09 - Current

Freelance Frontend Developer

Self-employed

• Currently working on a professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
• Improved website performance by compressing, caching and lazy loading images and components
• Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any
browser or device in the world

2022-07 - 2022-11

Front End Developer Internship

Frontend Simplified

• Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive
user interface using animations, transitions and carousels
• Processed API requests with Axios to dynamically represent data from a cloud server and

represented it
through skeleton loading states, pagination and dynamic routing
• Utilized Git version control and the GitHub interface to work and thrive in a virtual and
collaborative team
environment
