PROFILE

Self-motivated Software Developer with a passion for creating innovative solutions. Demonstrated proficiency in ReactJS, JavaScript, HTML and CSS through personal projects. Successfully built an anime browsing website in ReactJS to show the most popular and upcoming anime shows. You can find my projects showcased on my portfolio page, which I built in HTML, CSS, JavaScript ReactJS and NextJS. Eager to learn and contribute to a fast-paced development team.

EXPERIENCE

Private Hire Driver

Self Employed Contractor (UBER, Bolt and Green Destinations)   2021 – Present

- Customer Focus: As private hire driver, I interacted with people from diverse backgrounds. I honed my ability to communicate clearly, patiently, and professionally. Using this skill I addressed customer inquires and concerns.
- Problem-solving: Unexpected situations might arise during rides. I had to think on my feet to find solutions, such as rerouting due to traffic or mediating passenger disputes. In the moment I have to identify, analyse and resolve these situations in a calm, professional and efficient manner.
- Working independently: I was largely my own boss, setting my own schedule and managing my workload. This experience demonstrates my independence and self-motivation.

Production Operative/ Quality Operative

Jaguar Land Rover   2012 – 2021

Production Operative:
- Consistently met or exceeded production quotas while adhering to strict quality standards.
- Maintained a high level of accuracy by following assembly procedures and conducting visual inspections.
- Utilized strong hand-eye coordination and dexterity to assemble complex components efficiently.
- Collaborated effectively with team members to maintain a smooth production flow.
- Communicated effectively with colleagues to identify and resolve assembly line issues.

Quality Operative:
- Performed thorough inspections of manufactured parts to identify and address any defects.
- Maintained a keen eye for detail to ensure products met all quality control specifications.
- Implemented corrective actions to resolve identified quality issues.
- Followed established quality control procedures to maintain consistent product quality.
